Final-year CS undergrad specialising in AI Engineering | Offline LLM systems · Agentic pipelines · On-device ML deployment

TECHNICAL SKILLS

Programming Languages: Python, C++, Java, SQL

AI / ML: LLM Integration, NLP, Classification, Regression, Deep Learning, Naïve Bayes

Frameworks & Libraries: TensorFlow, TensorFlow Lite, OpenCV, Pandas, NumPy, Matplotlib, LangChain

AI Systems & Tools: Ollama (Local LLM), Vosk (Offline STT), Streamlit, SQLite, Git, GitHub

PROJECTS

ATLAS – Adaptive Thinking and Learning Autonomous System *Python · Ollama · Whisper · Coqui TTS · Electron · Flask · NLP*

- Built a fully offline, locally-run voice AI assistant – wake word detection, GPU-accelerated STT via Whisper, and neural TTS – that listens, speaks, and takes real action on the user's computer without any cloud API.
- Engineered a confidence-gated generic app launcher resolving any installed application by name via fuzzy search across Start Menu, drives, and Microsoft Store, with proactive reasoning triggers for distraction detection and reminders.
- Designed layered architecture: modular cognitive engine, system-awareness with 24/7 background activity logging, LLM-based long-term memory extraction, local vision via LLaVA, and a native Electron desktop GUI.

github.com/Samarth229/ATLAS-Adaptive-Thinking-and-Learning-Autonomous-System

AI Job Application Agent *Python · Gemini API · Ollama · Llama 3.1 · Streamlit · SQLite*

- Built end-to-end agentic pipeline: JD parsing → semantic ATS scoring → resume rewriting → cover letter generation → PDF export, cutting application prep from 45 min to under 3 min.
- Engineered hybrid LLM architecture – Gemini builds rewrite strategy (1 call); local Llama 3.1 rewrites all bullets offline, eliminating rate limits and keeping data private.
- Deployed Streamlit dashboard with SQLite application tracker, per-job file archiving, status management, and one-click PDF downloads for tailored resume and cover letter.

github.com/Samarth229/AI-Job-Application-Agent

SkinSync – On-Device ML Mobile App *Flutter · TensorFlow Lite*

- Developed CNN-based skin analysis app trained on 1K+ images; achieved ~88% accuracy with sub-300 ms on-device inference via TensorFlow Lite.
- Integrated real-time camera pipeline with on-device ML – no internet connection required.

EDUCATION

Vellore Institute of Technology, Bhopal Aug 2023 – May 2026
B.Tech in Computer Science and Engineering · CGPA: 8.19 / 10

Rao Junior College of Science 2023
Class XII – Maharashtra State Board (HSC)

Holy Angels' High School 2021
Class X – Maharashtra State Board (SSC)

CERTIFICATIONS

Introduction to Machine Learning – NPTEL (IIT Madras)
Fundamentals of AI and ML – VIT Yarthi

Data Science Virtual Experience – Finlatics
Python Programming – VIT Yarthi
